Community Name:	Brazilians	Course:	Ensign College - IT 340
Community Type:	Support	Student:	Luiz Machado

Community Description	Community Purpose	Key Products & Services created by, offered by, or used by the community	Key Community Needs that your Business Intelligence (BI) System will support
The "Brazilians" community is a network dedicated to Brazilians living in the United States. It is a space where expatriate Brazilians can come together, share experiences, and connect with their cultural roots while living in a different country. Additionally, it also welcomes people of other nationalities who, in some way, identify with Brazilian culture or have had the experience of living in Brazil. Our community aims to provide a sense of belonging and a welcoming environment for those seeking to maintain ties with Brazil and find support among fellow compatriots abroad.	The fundamental purpose of the "Brazilians" community is to offer emotional, cultural, and practical support to Brazilians living in the United States, as well as to anyone who has an affinity for Brazilian culture. We aim to meet the needs of our community by promoting cultural events, sharing useful information, providing guidance on life in the U.S., and ultimately helping our members feel more connected to their Brazilian roots. Among the things we seek to bring from Brazilian culture, we can mention music, dance, traditional foods, language, ways of interaction, and many other activities that enrich our cultural experience abroad.	The "Brazilians" community offers a variety of resources, including discussion forums, support groups, cultural events, practical tips for life in the U.S., and access to information about services specific to Brazilians, such as money transfer services and legal guidance. Additionally, we promote cultural activities that allow members to explore and share elements of Brazilian culture, such as music, dance, and cuisine.	The community has diverse needs, ranging from information about legal and immigration issues to tips on maintaining Brazilian traditions in a foreign environment. The BI system can help identify the most pressing needs of the community by highlighting popular topics, discussion trends, and areas where members are seeking more information and support. This includes analyzing cultural preferences and interests related to Brazilian culture.
Why does this community interest you?	This community interests me because I believe it is essential to offer support and a sense of belonging to Brazilians who are far from home, as well as to others who share a connection with Brazilian culture. As a member of the global community, it is important to provide a space where people can connect with their culture and cultural identity, regardless of their location.		
What are the key entities involved with this community?	Key entities involved with the "Brazilians" community include the community members themselves, volunteer moderators, experts in immigration and culture issues, as well as businesses and services that cater to the specific needs of Brazilians in the U.S. We also seek partnerships with cultural organizations and entities related to promoting Brazilian culture in the United States.		
How is data being used, can data be used, or should data be used by this community?	Data in this community can be used for various purposes, such as identifying topics of interest, understanding the community's needs, creating relevant content, and facilitating the organization of events and useful resources. Data may include demographic information, cultural preferences, discussion trends, and community engagement metrics, all with the goal of enhancing the experience and support offered to members. It is important to ensure the privacy and security of member data and adhere to data protection regulations when using this information. Additionally, data can also be used to personalize events and cultural activities according to the interests of the community.
